AMERICAN GENETIC ASSOCIATION

Index to Volume 64

The Journal of Heredity, 1973

A priori vs. *a posteriori* probabilities, William D. Stansfield, 304.

Abdel-Hameed, Fathi, *et al.*, Chromosome complement of *Zaprionus multistriatus*, 31.

Ackerman, W. L.: Aneuploidy in the *Camellia*, 197; Species compatibility relationships within the genus *Camellia*, 356.

Additional data for linkage group X of the German cockroach, Mary H. Ross, 44.

Allard, R. W. and M. T. Clegg, The genetics of electrophoretic variants in *Avena*, 3.

Allelic expression at enzyme loci in an intertribal hybrid sunfish, Gregory S. Whitt, William F. Childers, and Paula L. Cho, 55.

Allelism testing in barley: I. Analysis of ten mapped genes, T. Tsuchiya and T. E. Haus, 282.

Allozyme variation in populations of *Drosophila melanogaster* and *D. simulans* from northern Greece, Costas D. Triantaphyllidis, 69.

Anand, S. C., *et al.*, Inheritance of the coleoptile size in bread wheat, 340.

Anderson, J. F., *et al.*, Heterochromia irides in miniature swine, 343.

Aneuploidy in the *Camellia*, W. L. Ackerman, 197.

Animal Genetics

Cats: Canadian hairless or Sphinx, 47; gene frequencies in five Texas communities, 129; brown-orange tortoiseshell, 240; sex chromosome mosaics, aneuploids, polyploids, and chimerics in male tortoiseshell and calico, 272; gene frequencies in The Hague, 337.

Cattle: micrognathia and cerebellar hypoplasia in an Aberdeen Angus herd, 62; complete albinism in beef shorthorn calves, 189.

Cockroaches: data for linkage group X of German, 44; genetic variability in German, 143.

Deer: comparison of prophase and metaphase G-bands in the Muntjak, 80.

Dog: observations of dictyotene figures from canine ovary, 104.

Diptera: chromosome complement of *Zaprionus multistriatus*, 31; inversion used to facilitate recovery of translocation homozygotes and reduce genetic recombination on translocated third chromosomes of house flies, 247; isolation of a heat-sensitive translocation homozygote in house flies, 253.

Drosophila: allozyme variation in *D. melanogaster* and *D. simulans*, 69; enzyme variability in the *D. willistoni* group, 120; habitat selection in experimental populations of *D. melanogaster*, 163; study of chromosomal polymorphism in *D. pavani*, 175; influence of temperature on alcohol dehydrogenase polymorphism, 181; magnetism and X-ray induced sex-linked recessive lethals, 233; isozyme mutation rate in mutator stock of *D. melanogaster*, 309.

Fish: allelic expression in intertribal hybrid sunfish, 55.

Fowl: third Donald Duck beak anomaly, 46; crazy—a nervous disorder in Ancona chicks, 91; linkage relationships in domestic, 217; tipsy mutant in domestic, 310.

Gerbil: cytogenetic effects of 2,4,5-T on *in vivo* bone marrow cells of Mongolian, 213.

Hamsters: linkage of albinism and brown in Syrian, 232; long-hair mutation in Syrian, 236; rex coat mutation in Syrian, 239; recent advances in Syrian hamster genetics, 305.

Honey bee: recessive laranja eye mutation, 227.

Horses: index of research, 61; cytogenetics of superhorse, 95.

Mice: DDT-induced chromosomal damage, 7; genetic control of two esterase enzymes in *Peromyscus leucopus*, 43; genetic analysis of lifespan, fecundity, and weight, 87; electrophoretic variation of α-amylase, 155; neuronal mitochondrial changes in brains of nervous mutants, 193; inheritance of white-spotting, 260; association between β-galactosidase activities and coat color, 295; recessive exocrine pancreatic insufficiency, 301; monkey-mouse hybrid cells, 319; linkage of two loci in the deer mouse, 371.

Mink: prevention of otolith defect in pastel by manganese supplementation, 111; semilethal naked, 166.

Monkey: monkey-mouse hybrid cells, 319.

Mosquitoes: genetics of rose, an allele of the white locus, 19; linkage groups and recombination in the malaria, 133.

Quail: performance of crosses selected under different environments, 73.

Rabbits: response of females to male grafts in inbred lines, 321; hereditary diaphragmatic hernia, 333; recombination between buphthalmos and albino loci, 363.

Rats: light and dark coat-color genes in wild Norway population, 98; recessive hypodactyly mutation in Norway, 99; himalayan allele at albino locus in Norway, 303; mutagenic action of mitomycin C, 324.

Squirrel: pink-eyed dilution in Uinta ground, 106.

Swine: genetic control of blood biochemistry, 329; heterochromia irides in miniature, 343.

Arisumi, Toru, Chromosome numbers and interspecific hybrids among New Guinea *Impatiens* species, 77.

Association between β-galactosidase activities and coat color in mice, R. Seyedyazdani and Lars-G. Lundin, 295.

Aulakh, H. S., *et al.*, Inheritance of the coleoptile size in bread wheat, 340.

Award of the Meyer Memorial Medal to John G. Hawkes, 331.

Ayala, Francisco, J.: and Martin L. Tracey, Enzyme variability in the *Drosophila willistoni* group: VIII. Genetic differentiation and reproductive isolation between two subspecies, 120; and Michael E. Gilpin, Lack of evidence for the neutral hypothesis of protein polymorphism, 297.

Bains, K. S., *et al.*, Inheritance of the coleoptile size in bread wheat, 340.

Baker, Richard H.: and Richard K. Sakai, Genetics of rose, an allele of the white locus in a mosquito, 19; *et al.*, Linkage groups and recombination in the malaria mosquito, 133.

Barrow, Jerry R., *et al.*, Twin spots on leaves of homozygous cotton plants, 222.

Basl, Mary, *et al.*, Mutations in *Neurospora crassa* affecting ascus and ascospore development, 243.

Bauer, J., Jr., *et al.*, Recombination between buphthalmos and albino loci in the rabbit, 363.

Bemis, W. P., Triple haploids in *Curcurbita*, 103.

Bempong, Maxwell A. and Evelyn C. Trower, Sensitivity of rat testis to inhibitors of nucleic acid synthesis: II. Mutagenic action of mitomycin C, 324.

Benirschke, Kurt and Willard R. Centerwall, Male tortoiseshell and calico (T-C) cats: animal models of sex chromosome mosaics, aneuploids, polyploids, and chimerics, 272.

Bennett, Jack: *et al.*, Chromosome complement of *Zaprionus multistriatus*, 31; *et al.*, Recombination between buphthalmos and albino loci in the rabbit, 363.

Bias, W. B., *et al.*, Cytogenetic study of a 5/14 translocation in man, 299.
Bird, L. S., *et al.*, Linkage between blight resistance and yellow pollen color genes in cotton, 208.
Blair, S. M., *et al.*, Cytogenetic study of a 5/14 translocation in man, 299.
Bobst, Martha, *et al.*, Mutations in *Neurospora crassa* affecting ascus and ascospore development, 243.
Borgaonkar, D. S., *et al.*, Cytogenetic study of a 5/14 translocation in man, 299.
Boyle, W. S., Cytogenetic effects of Benlate fungicide on *Allium cepa* and *Secale cereale*, 49.
Brncic, Danko, Further study of chromosomal polymorphism in *Drosophila pavani*, 175.
Brown-orange tortoiseshell cat, M. Lynn Lamoreux, 240.
Brumback, Roger A., Monkey-mouse hybrid cells: a preliminary study, 319.
Buckland, R. B., *et al.*, Tipsy: a new mutant in the domestic fowl, 310.
Burk, L. G.: *et al.*, *Nicotiana repanda* as a potential source for disease resistance in *N. tabacum*, 265; and C. L. Gupton, Location of the factor for resistance to potato virus Y in tobacco, 289; Partial self-fertility in a theoretical amphiploid progenitor of *N. tabacum*, 348.

Canadian hairless or Sphinx cat, Roy Robinson, 47.
Casady, A. J. and G. H. Liang, Inheritance of the sunred character of sorghum seed, 279.
Cat gene frequencies in five Texas communities, Raymond A. Gerdes, 129.
Centerwall, Willard R. and Kurt Benirschke, Male tortoiseshell and calico (T-C) cats: animal models of sex chromosome mosaics, aneuploids, polyploids, and chimerics, 272.
Chai, C. K., The response of females to male grafts in inbred lines of rabbits, 321.
Changes in neuronal mitochondrial shape in brains of nervous mutant mice, S. C. Landis, 193.
Chapman, Verne, *et al.*, Electrophoretic variation of α-amylase in two inbred strains of *Mus musculus*, 155.
Characterization of the citrine phenotype of the tomato, A. F. Reeves, J. F. Wickliff, and W. M. Harris, 9.
Charrier, M. F.: *et al.*, Hypodactyly, a new recessive mutation in the Norway rat, 99; *et al.*, Himalayan allele at the albino locus in the Norway rat, 303.
Chaudhari, Hemendra, *et al.*, Twin spots on leaves of homozygous cotton plants, 222.
Childers, William F., *et al.*, Allelic expression at enzyme loci in an intertribal hybrid sunfish, 55.
Chirolas, Darlene and M. Grossman, Computer assisted instruction in teaching quantitative genetics, 101.
Cho, Paula L., *et al.*, Allelic expression at enzyme loci in an intertribal hybrid sunfish, 55.
Christensen, K. and P. Sørensen, Degree of heredity, 298.
Christoff, Gregory T. and Seaward A. Sand, Cytoplasmic-chromosomal interactions and altered differentiation in tobacco, 24.
Chromatin elimination induced by the B chromosome of maize, M. M. Rhoades and Ellen Dempsey, 13.
Chromosome complement of *Ricinus communis* at pachytene and early diplotene, G. Jelenkovic and E. Harrington, 137.
Chromosome complement of *Zaprionus multistriatus*, R. J. Sciandra, Fathi Abdel-Hameed, and Jack Bennett, 31.
Chromosome numbers and interspecific hybrids among New Guinea *Impatiens* species, Toru Arisumi, 77.
Clegg, M. T. and R. W. Allard, The genetics of electrophoretic variants in *Avena*, 3.
Coffelt, Terry A. and Ray O. Hammons, Influence of sizing peanut seed on two phenotypic ratios, 39.
Comparison of prophase and metaphase G-bands in the Muntjak, Rosalyn M. Patterson and John C. Petricciani, 80.
Complete albinism in beef shorthorn calves, H. J. Greene, H. W. Leipold, K. M. Gelatt, and K. Huston, 189.
Computer assisted instruction in teaching quantitative genetics, M. Grossman and Darlene Chirolas, 101.
Connelly, M. E., *et al.*, Long-hair: a new mutation in the Syrian hamster, 236.
Corcos, Alain F., Montaigne's insight in questioning heredity, 50.
Crary, D. D. and R. R. Fox, Hereditary diaphragmatic hernia in the rabbit: genetics and pathology, 333.
Crazy—a nervous disorder in Ancona chicks, W. H. McGibbon, 91.
Crenshaw, David, Micrognathia and cerebellar hypoplasia in an Aberdeen Angus herd, 62.
Cytogenetic effects of 2,4,5-T on *in vivo* bone marrow cells of Mongolian gerbils, S. K. Majumdar and R. C. Hall, 213.
Cytogenetic effects of Benlate fungicide on *Allium cepa* and *Secale cereale*, W. S. Boyle, 49.
Cytogenetic studies on a transmissible deficiency in chromosome 3 of maize, M. M. Rhoades and Ellen Dempsey, 125.
Cytogenetic study of a 5/14 translocation in man, D. S. Borgaonkar, S. M. Blair, B. Lutz, T. Kelly, R. R. Tice, N. V. Delaney, J. R. Hutchinson, and W. B. Bias, 299.
Cytogenetics of the superhorse, M. B. Marx, J. Melnyk, G. Persinger, S. Ohno, W. McGee, W. Kaufman, A. Pessin, and R. Gillespie, 95.
Cytogenetics (Rev. of Brown: *Textbook of Cytogenetics*), B. K. Vig, 172.
Cytoplasmic-chromosomal interactions and altered differentiation in tobacco, Seaward A. Sand and Gregory T. Christoff, 24.

DDT-induced chromosomal damage in mice, Gregg A. Johnson and S. M. Jalal, 7.
"Degree of heredity," Gordon E. Dickerson, 6.
Degree of heredity, K. Christensen and P. Sørensen, 298.
Delaney, N. V., *et al.*, Cytogenetic study of a 5/14 translocation in man, 299.
Dempsey, Ellen and M. M. Rhoades: Chromatin elimination induced by the B chromosome of maize, 13; Cytogenetic studies on a transmissible deficiency in chromosome 3 of maize, 125.
Dickerson, Gordon E., "Degree of heredity," 6.
Differences in anther number in reciprocal hybrids between cultivated Asiatic cottons and *Gossypium anomalum*, S.S. Narayanan and S.R. Sree Rangasamy, 307.
Doolittle, D. P. and Linda L. Hulbert, Inheritance of white spotting in mice, 260.
Dreux, Ph. and J. C. Legel, Gene frequencies in the cat population of The Hague, 337.
Drolsom, P. N. and Shree P. Singh, Induced recessive mutations affecting leaf angle in *Sorghum bicolor*, 65.
Drooping syndrome of *Ricinus*, Oved Shifriss, 351.
Dunford, Max P., *et al.*, Twin spots on leaves of homozygous cotton plants, 222.

Edmonds, Larry, *et al.*, Micrognathia and cerebellar hypoplasia in an Aberdeen Angus herd, 62.
Effect of mutation and selection in full-sib lines and sublines: a correction, J. F. Kidwell, 169.
Electrophoretic variation of α-amylase in two inbred strains of *Mus musculus*, Richard D. Kaplan, Verne Chapman, and Frank H. Ruddle, 155.
Enzyme variability in the *Drosophila willistoni* group: VIII. Genetic differentiation and reproductive isolation between two subspecies, Francisco J. Ayala and Martin L. Tracey, 120.
Epp, Melvin D., Genetic analysis of two recessive mutations in *Oenothera hookeri*, 257.
Erway, Lawrence C. and Sidney E. Mitchell, Prevention of otolith defect in pastel mink by manganese supplemention, 111.
Esen, Asim and Robert K. Soost, Precocious development and germination of spontaneous triploid seeds in *Citrus*, 147.
Etches, R. J., *et al.*, Tipsy: a new mutant in the domestic fowl, 310.
Evans, Garath M., *et al.*, A natural tetraploid mungbean of suspected amphidiploid origin, 107.
Exocrine pancreatic insufficiency: a new recessive mutation in mice, Omar H. Pivetta and Earl L. Green, 301.

Feaster, Carl V. and E. L. Turcotte, The interaction of two genes for yellow foliage in cotton, 231.
Fox, R. R. and D. D. Crary, Hereditary diaphragmatic hernia in the rabbit: genetics and pathology, 333.
Further study of chromosomal polymorphism in *Drosophila pavani*, Danko Brncic, 175.

Ganapathy, P. S. and J. G. Scandalios, Malate dehydrogenase isozymes in haploid and diploid *Datura* species: their use as markers in somatic cell genetics, 186.
Gelatt, K. N., *et al.*: Complete albinism in beef shorthorn calves, 189; Heterochromia irides in miniature swine, 343.
Gene frequencies in the cat population of The Hague, Ph. Dreux and J. C. Legel, 337.

General Genetics

A priori vs. *a posteriori* probabilities, 304.
Computer assisted instruction in teaching quantitative genetics, 101.
Cytogenetics (Rev.), 108; (Rev.), 172.
"Degree of heredity," 6; 298.
Effect of mutation and selection in full-sib lines and sublines, 169.
Interest in hybridization in Moravia before Mendel came to Brno, 51.
Lack of evidence for the neutral hypothesis of protein polymorphism, 297.
Montaigne's insight in questioning heredity, 50.
Scientific milieu in Brno during the era of Mendel's research, 314.
Short course in mammalian genetics, 23.

Genetic analysis of lifespan, fecundity, and weight in the mouse, Donald J. Nash and James F. Kidwell, 87.
Genetic analysis of the open bud mutant in cotton, R. J. Kohel, 237.
Genetic analysis of two recessive mutations in *Oenothera hookeri*, Melvin D. Epp, 257.
Genetic control of blood biochemistry, M. P. Mi, M. N. Rashad, and F. K. Koh, 329.
Genetic control of two esterase enzymes in *Peromyscus leucopus*, Patrick L. Wilmot and Donald K. Underhill, 43.
Genetic nomenclature in cotton, R. J. Kohel, 291.
Genetic variability in the German cockroach: IX. Genetics of narrow abdomen and elo black-body, Mary H. Ross, 143.
Genetics of boron and iron transport in the tomato, E. V. Wann and W. A. Hills, 370.
Genetics of electrophoretic variants in *Avena*, M. T. Clegg and R. W. Allard, 3.
Genetics of rose, an allele of the white locus in a mosquito, Richard H. Baker and Richard K. Sakai, 19.
Genome relationship of *Hibiscus mutabilis*, Dwayne A. Wise, 285.
Gerdes, Raymond A., Cat gene frequencies in five Texas communities, 129.
Gillespie, R., *et al.*, Cytogenetics of the superhorse, 95.
Gilpin, Michael E. and Francisco J. Ayala, Lack of evidence for the neutral hypothesis of protein polymorphism, 297.
Green, Earl L. and Omar H. Pivetta, Exocrine pancreatic insufficiency: a new recessive mutation in mice, 301.
Greene, H. J., *et al.*, Complete albinism in beef shorthorn calves, 189.
Grossman, M. and Darlene Chirolas, Computer assisted instruction in teaching quantitative genetics, 101.
Gupton, C. L. and L. G. Burk, Location of the factor for resistance to potato virus Y in tobacco, 289.

Habitat selection in experimental populations of *Drosophila melanogaster*, Frank P. Saitta, 163.
Hall, R. C. and S. K. Majumdar, Cytogenetic effects of 2,4,5-T on *in vivo* bone marrow cells of Mongolian gerbils, 213.

Plant Genetics

Allium: cytogenetic effects of Benlate fungicide on *A. cepa* and *Secale cereale*, 49.
Aspergillus nidulans: phenotypes of the eight disomics and trisomics, 35.
Barley: analysis of ten mapped genes, 282.
Camellia: aneuploidy in, 197; species compatibility relationships, 356.
Citrus: precocious development and germination of spontaneous triploid seeds, 147.
Cotton: linkage between blight resistance and yellow pollen color genes, 208; twin spots on leaves of homozygous plants, 222; interaction of two genes for yellow foliage, 231; genetic analysis of open bud mutant, 237; genetic nomenclature, 291; differences in anther number in reciprocal hybrids between cultivated Asiatic cottons and *Gossypium anomalum*, 307.
Curcurbita: triple haploids, 103.
Datura: malate dehydrogenase isozymes in haploid and diploid species, 186.
Hibiscus: genome relationship of *H. mutabilis*, 285.
Impatiens: chromosome numbers and interspecific hybrids among New Guinea species, 77.
Maize: chromatin elimination induced by B chromosome, 13; locating major genes for resistance to corn earworm in inbreds, 83; cytogenetic studies on a transmissible chromosome 3 deficiency, 125.
Matthiola: origin and effects of extrusion of unstable *S* chromosome into cytoplasm of diploid *M. incana*, 359.
Mungbeans: Natural tetraploid of suspected amphidiploid origin, 107.
Muskmelon: inheritance of a virescent mutant, 311.
Neurospora: mutations affecting ascus and ascospore development in *N. crassa*, 243.
Nicotiana: cytoplasmic-chromosomal interactions and altered differentiation, 24; meiotic chromosome pairing in an F-chromosome deficient interspecific hybrid, 169; *N. repanda* as potential source for disease resistance in *N. tabacum*, 265; location of factor for resistance to potato virus Y in tobacco, 289; partial self-fertility in theoretical amphiploid progenitor of *N. tabacum*, 348.
Oats: genetics of electrophoretic variants in *Avena*, 3.
Oenothera hookeri: genetic analysis of two recessive mutations, 257.
Peanuts: influence of sizing seed on two phenotypic ratios, 39.
Rhoeo: meiotic chromosome behavior in *R. spathacea*, 365.
Rice: rice breeding (Rev.), 240.
Ricinus communis: chromosome complement at pachytene and early diplotene, 137; drooping syndrome, 351.
Rye: cytogenetic effects of Benlate fungicide on *Allium cepa* and *Secale cereale*, 49.
Sorghum: induced recessive mutations affecting leaf angle in *S. bicolor*, 65; inheritance of sunred seed character, 279.
Sweet potato: premature flowering, 368.
Tomatoes: characterization of citrine phenotype, 9; inheritance of inflorescence, 158; genetics of boron and iron transport, 370.
Wheat: inheritance of coleoptile size in bread wheat, 340.

Precocious development and germination of spontaneous triploid seeds in *Citrus*, Asim Esen and Robert K. Soost, 147.
Premature flowering of the sweet potato, F. W. Martin, 368.
Prevention of otolith defect in pastel mink by manganese supplementation, Lawrence C. Erway and Sidney E. Mitchell, 111.
